BENTONVILLE, ARKANSAS

KARST

Pitch Deck Content

407–409 SE F St — SE Market District

February 2026

Confidential

Pitch Deck — KARST

> *Slide-by-slide content for ~18 slides. Target audience: Ramsay Ball (Focus), with Blue Crane/Runway Group as secondary. Structure: Developer Value → Opportunity → Concept → Model → Team → Ask*

Slide 1: Cover

[FULL-BLEED IMAGE: Concept render — exterior at golden hour, timber-and-stone building with Greenway trail in foreground, warm light glowing through glass upper level]

KARST *Ancient ground. Present moment.*

407-409 SE F St, Bentonville, AR

Slide 2: The Investment Thesis

This concept raises property values for the entire block.

VALUE DRIVER	IMPACT
Foot traffic engine	500-800 daily visits at maturity — the highest-traffic use available for this site
Demographic lock	1,500 high-income member households visiting 3x/week — captive audience for every adjacent tenant
Ice House synergy	The 2028 redevelopment next door gains an immediate anchor neighbor. Office and retail tenants benefit from a wellness destination on the same block.
Brand halo	A national content brand based at this address elevates the entire district's identity
Ecosystem completion	This is the one gap in the SE Market District: a wellness anchor

Pattern: Crystal Bridges raised downtown Bentonville property values. 8th Street Market created the SE Market District identity. This concept does the same for this block.

Speaker notes: Lead with what matters to the developer. This is a real estate value play, not just a tenant placement. Every other planned use in the Ice House and SE Market District benefits from having a wellness anchor adjacent.

Slide 3: The Gap

Bentonville has everything — except the product.

WHAT BENTONVILLE HAS	WHAT IT DOESN'T
$112K median household income (verified Census 2024)	No premium wellness destination
605K+ metro population, 22nd fastest-growing US metro	No multi-modality wellness facility
$2B+ Walton wellness & healthcare investment	No thermal/contrast therapy at scale
World-class trails — "Mountain Biking Capital of the World"	No wellness content brand
Alice Walton School of Medicine (opened 2025)	No experiential wellness hub
Crystal Bridges → 600K+ annual cultural visitors	No wellness tourism anchor

The premium wellness market is structurally undersupplied.

Speaker notes: Every comparable market at $112K HHI supports 3-5 premium wellness destinations. Bentonville has zero. The institutional foundation ($250M medical school, $700M Mercy/Cleveland Clinic partnership, Heartland Whole Health Institute) is explicitly aligned with preventive wellness. The market exists — the product doesn't.

Slide 4: The Moment

Three catalysts converging on one block.

1. **The Ice House redevelopment (2028)** — acquired late 2025 for $7.5M by Hart & Ashley Group. The adjacent building is about to become a mixed-use destination with condos, commercial, and rooftop garden. This block needs a wellness anchor.
2. **SE Market District investment** — 8th Street Market, The Momentary, Town Branch (360 units), Compton Hotel, Lightbox, The Holler. The district is being built. The gap is wellness.
3. **Thermal wellness boom** — $71.7B global thermal/bathing market growing 10%/yr. McKinsey 2024 explicitly names "social bathing" as a major consumer trend. Sauna House expanding to 9+ locations. Othership raised $20.6M. Therme Group committing $1.5B to US market entry.

The window is now.

Slide 5: The Site

407-409 SE F St — the best block in Bentonville for wellness.

[MAP: Aerial or neighborhood map showing site location relative to:] - The Momentary (adjacent) - 8th Street Market (2 blocks) - Ice House (adjacent — 2028 redevelopment) - Razorback Greenway (directly on trail) - Town Branch residential (walking distance) - Downtown Square (5-minute walk)

This is the only site in Bentonville where all five factors converge: 1. **Trail-connected** — Razorback Greenway delivers target customers to the front door (92K+ cyclists/yr + 66K+ pedestrians) 2. **Cultural anchor adjacent** — The Momentary drives 500K+ annual visits to this neighborhood 3. **Food hub proximity** — 8th Street Market already attracts health-conscious consumers 4. **Residential density** — Town Branch (360 units) within walking distance 5. **Ice House catalyst** — Adjacent redevelopment creates a campus, not just a building

---

Slide 6: The Concept

KARST: A complete wellness journey encoded in architecture.

Not a gym. Not a spa. Not a clinic.

A multi-level destination integrating movement, recovery, nutrition, community, learning, and content production — drawing on the Ozark landscape as design language.

The cave-to-sky journey:

LEVEL	NAME	EXPERIENCE
Underground	The Cave	40-person communal sauna, cold plunges (45-55°F), steam, mineral baths. Stone, cedar, atmospheric light. Cell-phone-free.
Ground	The Foundation	Strength floor, 25ft climbing wall (original warehouse height), studios (yoga, Pilates, breathwork), nutrition bar (public-facing).
Upper	The Canopy	Media production studio, wellness library, event space, practitioner rooms. Greenhouse glass, living plant walls.
Rooftop	The Sky	Outdoor lounge, rooftop garden, yoga grass strip, panoramic Ozark views.

Design DNA: "Ozark-Nordic" — E. Fay Jones organic architecture + Nordic warm minimalism + Japanese onsen reverence. Materials: Ozark limestone, mass timber, cedar, riverstone, preserved warehouse steel.

Slide 7: The Experience (Hero)

[FULL-BLEED IMAGE: Concept render — The Cave. Dim atmospheric space, cedar-lined communal sauna, stone walls, warm bodies in silhouette, steam rising from mineral pools, riverstone floors]

The Cave — the heart of the building. No facility in NWA offers communal contrast therapy at this scale. BlakeSt. is the closest comparable at a fraction of the capacity.

The journey: You descend into the earth — stone narrows, light dims, temperature shifts. An hour of contrast therapy (hot, cold, hot, cold, rest). Then you ascend through timber and glass into the canopy

— greenhouse light, living walls, a curated library. You emerge on the rooftop to Ozark hills stretching to the horizon.

Speaker notes: The architectural narrative IS the differentiator. This isn't another recovery studio. It's a destination experience that doesn't exist anywhere in the region.

Slide 8: The Content Engine

A built-in media studio creates national brand and revenue.

The building is designed to be camera-ready from every angle. A dedicated production studio produces nationally-reaching wellness content — podcasts, video, social — from the most visually compelling wellness space in the region.

MEDIA REVENUE STREAM	YEAR 1	YEAR 3 (MATURITY)
Brand sponsorships	$50K	$200-300K
Affiliate/referral	$25K	$100-150K
Content licensing	$0	$50-100K
Equipment partnerships	$25K	$50-100K
Total	**$100K**	**$400-650K**

Why this matters for the developer: Content drives wellness tourism (day-pass visitors), builds national brand recognition for the address, and creates revenue that no comparable wellness facility generates.

Important: The financial model works without media revenue (see next slide). This is upside, not a load-bearing assumption.

Speaker notes: No comparable-scale thermal wellness facility has integrated content production into its architectural design. This is a genuine differentiator. Jordan Carlisle brings content strategy and production expertise from his work building the Cipher health brand and his background as a tech CTO.

Slide 9: Business Model

Seven revenue streams. Three membership tiers. $5.5M+ at maturity — before media.

Membership Tiers

TIER	PRICE	INCLUDES
Foundation	$99-149/mo	Fitness, climbing, 4 classes/mo
Immersion	$150-249/mo	+ Unlimited contrast therapy, classes, library
All-Access	$250-350/mo	+ Guest passes, practitioner discounts, studio access, priority booking

Revenue at Maturity (Year 3+)

STREAM	ANNUAL (BASE)	ANNUAL (W/ MEDIA)	% (BASE)
Memberships (1,500 members)	$3.4M	$3.4M	62%
Day passes & sessions	$480K	$480K	9%
Nutrition bar	$350K	$350K	6%
Classes & programs	$300K	$300K	5%
Practitioner services	$360K	$360K	7%
Events & space rental	$420K	$420K	8%
Media & content	—	$600K	—
Total	**$5.3M**	**$5.9M**	**100%**

EBITDA margin at maturity: 30-40% (base) / 35-45% (with media)

Speaker notes: The model is presented two ways — without and with media revenue. Base case generates $5.3M and healthy EBITDA without any content revenue. Media is upside. Local pricing validated: SALT Health waitlists at $349/mo, BlakeSt. charges $255/mo + initiation. Our pricing is competitive.

Slide 10: Market Validation

Comparable concepts prove demand at every scale.

CONCEPT	LOCATION	SIZE	REVENUE EST.	PRICING
Othership	Toronto	5K sq ft	~$21M run rate	~$178/mo membership
Sauna House	Asheville → 9 locations	7-8.5K sq ft	Inc. 5000 #838	$45-59/session
Bathhouse	Brooklyn	16K sq ft	$5-8M est.	$40-65 day pass
Aire Ancient Baths	NYC, Chicago	8-12K sq ft	$5-10M est.	$103-660/session
BlakeSt.	Bentonville (local)	21K sq ft	$1-2M est.	$155-255/mo + $1K init.

Our $5.3M base projection is conservative relative to comparables at this scale.

Local validation: BlakeSt. and SALT Health prove Bentonville pays premium prices. C-Suites, Zivel, and Pure Balance prove contrast therapy demand exists. No one integrates them into a full-spectrum destination. The gap is structural.

Slide 11: Development Investment

Estimated project cost: $14-20M total development.

COMPONENT	ESTIMATE	NOTES
Property acquisition	TBD (developer)	407-409 SE F St
Adaptive reuse + new construction	$10-16M	30-40K sq ft at $300-450/sq ft. NWA costs 15-25% below coastal markets.
FF&E (equipment, sauna systems, kitchen)	$1-2M	Premium fitness, thermal infrastructure
Technology infrastructure	$200-400K	Climate control, media studio, wearable integration
Pre-opening costs	$300-500K	Staff, marketing launch, inventory
Total	**$14-20M**	Underground excavation scope is primary variable

Key variable: The underground level (The Cave) scope drives the cost range. Phase 1 due diligence — geotechnical assessment of the Ozark limestone beneath the site — determines whether the underground program requires excavation or can utilize existing below-grade space.

Return profile: At $5.3M base revenue and 30%+ EBITDA margins, the facility generates $1.6M+ in annual operating profit at maturity. Combined with property value appreciation from the ecosystem effect, the developer's return profile is attractive on both operating and real estate bases.

Slide 12: Risk & Downside Protection

We've thought about what could go wrong.

RISK	MITIGATION
Operator underperformance	Long-term lease with personal guarantees. Building designed for multi-tenant wellness use — can be re-tenanted to another operator if needed. Core thermal/fitness infrastructure has value to any wellness operator.
Membership ramp slower than projected	Break-even at ~600-700 members (Year 1-2 achievable). Day passes and corporate events provide cash flow during ramp. Pre-opening membership drive leverages existing NWA community relationships.
Construction cost overrun	Phased scope: underground cave can be built in Phase 2 if Phase 1 (ground + upper + rooftop) proves demand. Each phase is independently viable.
Market timing	Ice House development (2028) provides natural co-launch catalyst. But the wellness gap exists now — concept is viable independent of Ice House timeline.
Underground excavation complexity	Geotechnical assessment is Phase 1 due diligence item. If limestone conditions are unfavorable, underground program can be redesigned as ground-level thermal wing.

Speaker notes: Proactively addressing these questions shows we're operators, not dreamers. The phased approach is key — we don't need to build the full vision on day one to prove the model.

Slide 13: The Team

FOUNDER	ROLE	BACKGROUND
Jordan Carlisle	Co-founder / Health Optimization & Media	CTO at Sober Sidekick (health tech). Cipher health coaching founder. Content strategy, data-driven health optimization, technology systems.
Kathryn Carlisle	Co-founder / Movement & Experience	Movement practice, outdoor wellness, experience design, community building.
Justin Ternes	Co-founder / Holistic Health & Recovery	Health coaching, contrast therapy expertise, holistic wellness programming.
Chelsea Adair	Co-founder / Coaching & Community	Health coaching, community building, program design, group facilitation.

Addressing the Experience Gap

We are wellness and technology experts, not facility operators — and we know it. Our plan:

- **Hospitality operations advisor** (in formation) — experienced wellness facility GM to advise on pre-opening, staffing, and operations playbook
- **F&B consultant** — nutrition bar operations designed with professional food service guidance
- **Real estate counsel** — experienced NWA commercial attorney for deal structuring
- **Architect partnership** — 20+ firms evaluated; shortlist includes Marlon Blackwell (Fayetteville), Modus Studio (NWA), Olson Kundig (Seattle)

What we bring that operators don't: A differentiated concept, a content engine, a technology integration vision, health optimization methodology, and deep community relationships in NWA.

Slide 14: Timeline & Phased Development

PHASE	TIMELINE	MILESTONES	INVESTMENT
Phase 1: Partnership	Q1 2026	Developer LOI, site assessment, geotechnical study, architect selection	$50-100K (due diligence)
Phase 2: Design	Q2-Q4 2026	Concept design, construction docs, permitting, community engagement	$500K-1M (soft costs)
Phase 3: Construction	2027	Adaptive reuse + new construction, equipment procurement, staff hiring	$12-18M (hard costs)
Phase 4: Launch	Early 2028	Pre-opening membership drive, soft launch, grand opening	$300-500K (pre-opening)
Phase 5: Maturity	2028-2030	Full programming, membership ramp to 1,500, content brand establishment	Operating revenue

Key timing note: Phase 4 launch coordinates with the Ice House redevelopment (2028), creating simultaneous activation that maximizes mutual impact.

Slide 15: The Ask

We need a development partner — not a landlord.

What We're Proposing

A **co-development partnership** where our team operates and the developer acquires and builds.

WE BRING	PARTNER BRINGS
Fully developed concept and programming	Property acquisition (407-409 SE F St)
Operations team and wellness expertise	Construction financing ($14-20M)
Content engine and national brand	Zoning, permitting, construction management
Customer base and NWA community relationships	Long-term real estate investment horizon
Revenue from day one	Ecosystem perspective on block value

Proposed Structure

- Long-term lease (15-20 year) with personal guarantees
- TI allowance or co-investment from developer
- Operator funds FF&E and pre-opening
- Optional developer upside participation in operating revenue

Next Steps

1. **Site visit together** — walk the block, see the Momentary adjacency, visualize the concept
2. **Geotechnical assessment** — understand the underground potential
3. **Architect selection** — partner on selecting a firm to realize the vision
4. **LOI and deal structure** — define the co-development terms

The market is ready. The site is ready. Let's build the wellness anchor this district needs.

Appendix (Available on Request)

- Detailed pro forma and financial model with sensitivity analysis
- Architect reference board (20+ firms evaluated)
- Full market research brief (demographics, competitive landscape, institutional investment)

- Comparable concepts deep-dive (Othership, Sauna House, Bathhouse, Aire, Equinox, Therme)
- Architecture brief for concept renders (AI-ready, level-by-level specs)
- Sustainability strategy
- Technology integration plan
- Developer intelligence: Focus / Blue Crane / Runway Group profiles

---

Deck design: Dark slides for experiential sections (Cave hero, Content Engine). Light slides for data, model, team. Full-bleed concept renders where noted. Typography-led thesis statements. See `brand.md` for color palette and type system.
